OBJECTIVE

BMO Low Volatility Canadian Equity ETF has been designed to provide exposure to a low beta weighted portfolio of Canadian stocks. Beta measures the security's sensitivity to market movements. ZLB utilizes a rules based methodology to select the least market sensitive stocks based on five year beta. The 40 lowest beta stocks from the 100 largest and most liquid securities in Canada are selected. The underlying portfolio is rebalanced in June and reconstituted in December.

Past performance is no guarantee of future performance. All returns are historical annual compounded total rates of return and reflect changes in yield and distributions reinvested. Managed Indexed, Managed Portfolios and Market Indexed accounts credit an interest amount mirroring the net rate of return of a specified underlying investment, less a BMO Life Assurance Company daily management fee. These rates of return do not reflect the current BMO Life Assurance Company management / universal life fee which must be taken into consideration when determining the net return earned on the account.
